

FINANCE AND BANKING

What types of ATM installations does McCollister's support?

McCollister's supports through-the-wall (TTW) ATMs, drive-through/island construction, and free-standing lobby ATM kiosks, including challenging rigging and installations aligned to customer QC and compliance standards.

Will I have a dedicated project manager and consistent updates?

Yes. McCollister's project managers and rigging experts work with customers through each project phase; managers are responsible for planning, permitting, and construction and can meet client-dictated update cadences.

How do you address ADA compliance risk?

McCollister's verifies ATM installations for ADA compliance, including required height, wheelchair access, and access pathways, helping reduce exposure to alleged violations.

Can you support multi-site deployments?

Yes. McCollister's is an all-in-one source for programmatic deployment and installation and provides logistics support that includes nationwide warehousing, staging, distribution, reverse logistics, and disposal—helpful for repeat deployments across multiple locations.

Do you support decommissioning or certified destruction?

Yes. McCollister's offers PCI destruction & NPI decommissioning services and can provide documentation supporting confidentiality and proper handling.
